Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a process for production of hydrocarbons by the Fischer-Tropsch process.

Group II, claim(s) 6-9, drawn to a chemical plant for production of liquid hydrocarbons. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The conversion of hydrocarbon feedstock to hydrocarbons by the Fischer-Tropsch process is well-known in the art as shown in US patent 6,172,124. Thus, the conversion of hydrocarbon feedstock to heavier hydrocarbons can be practice with a similar apparatus as shown in the art. Therefore there is no special technical feature that links the Group I and II together.

A telephone call was made to Mr. Lewis on 8/5/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1621

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
